

## How Attach Plus™ Makes You More Productive & Secure!

Sensitive document?... Send it securely!

**Attach as PDF, ZIP or Network Shortcut Link**

### Attach from your e-mail program

E-MAIL PAPERCLIP BUTTON

### Attach from Word, Excel, etc.. or Windows Explorer

ATTACH OPEN FILES

ATTACH WITHOUT OPENING

### Attach from any program that can Print

PRINT TO PDF & ATTACH

PRINT TO PDF, SAVE & ATTACH

Did you know Attach Plus can also help with interoffice security?

#### How it works:

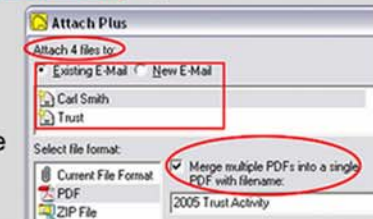

1. User prints document to Attach Plus Save & E-mail PDF.
2. Attach Plus asks where the user wants to save the PDF; user saves it to a secure network folder.
3. User chooses the Shortcut format from Attach Plus and sends the e-mail to the appropriate recipients.
4. The Shortcut to the file can only be opened by those with access rights to that folder. (based on Windows login)

### Combine your documents fast!

:: Attach Plus allows you to "Merge" **multiple documents** into a single PDF. You can combine a Word document, Excel document and a Print job into one secure PDF and send via e-mail.

:: Send each file to the Attach Plus window using any of the attachment methods. Once accumulated, **then** check "Merge" & click Attach.

### Attach Plus allows multitasking to the max!

:: Attach Plus allows you to work with **new e-mails or e-mails you have in progress**. You can attach on-the-fly any opened or closed documents...even multiple print jobs.
